

NAVIGATION SAFETY NOTICE

Date & time of issue: 29th June 2018 0800

Number: 03/2018

Message: USE OF HINGED FIN ANTI-ROLL DEVICES

Hinged fin anti-roll devices may protrude from the side of vessels a few metres under the water. This poses a significant navigational hazard to passing vessels in the lowered position and their presence is not obvious to other vessels. Master, owners and operators of vessels where hinged fin anti-roll devices are fitted should ensure they are raised and secured when inside Nelson harbour limits.

Issued by: Nelson Harbourmaster

Valid to: Until further notice
